

## **WATER POLICY**

As Optimal Tourism, we aim to create a positive impact for the planet by reducing our environmental footprint in line with our sustainability vision.

Water in our fields of activity; It is used for cleaning, sanitary and irrigation purposes. Although our water impacts from our own activities are not high; We act with the awareness and awareness of the importance of water for our value chain and all our stakeholders.

In accordance with the principles of the United Nations Global Compact and the Human Rights Policy of Optimal Tourism, of which we are a signatory, we apply the following principles, taking into account the right of all living things on the planet to access clean water and sanitary conditions:

- We continue to work in full compliance with the national/international legislation we are subject to in terms of water.
- We identify, review and report our water and climate-related risks and opportunities within the scope of ISO 14001 and integrated with our corporate risk management processes.
- We constantly review our business processes for the protection and sustainability of water resources, adopt best practices and follow innovations.
- We take the necessary measures to protect water resources and prevent water pollution in all of our fields of activity, monitor and report our consumption and carry out studies to further reduce it.
- By focusing on recovering and reusing water, reducing water consumption and improving water monitoring systems, we set targets and carry out projects to improve our water performance and increase resource efficiency.
- In order to support the health and well-being of our employees and stakeholders in our work areas, we take the necessary measures to provide safe drinking water and to apply hygiene standards.
- We encourage all our stakeholders, especially our employees, suppliers and business partners, to continue their activities environmentally responsibly.
- In order to reduce the water footprint arising from all kinds of tools and equipment we use throughout our life cycle, we evaluate the possibilities of transition to a circular economy in our activities and implement projects to realize them.

Creation and implementation of this policy, which covers all activities of our company; The business unit is provided by the coordination of the environmental and administrative affairs departments. The review and approval of the policy is carried out by the Quality Department and the Sustainability Team.
